Great. Let me know once you come up with your estimate of how much time you think it will take. Gina will want me to note that in the BaP RAP sheet.

Also, I can send you the word document of what went to the SAB. You can make edits in track changes to that version and I will add those changes to the master draft. As far as response to comments, you can just email those to me and I'll add them in.

Thanks. And sorry to pull you away from chromium!

Hey I just talked to Andrew and I have the green light but I need to keep updating them on my timeline.

Also, will I actually be editing the draft for this? If so, is there a copy someplace I should be adding to? Or should I keep any changes in a separate draft for now.

Hi Kathleen, see my thoughts in red below. Thanks for sending these! Of course I need to see what Andrew and management think about the time required to do this, but since the BaP assessment is a priority right now, then I think I should stop work on Cr6 for the moment and put my attention to these. Thanks!

**Subject:** BaP-SAB comments re: carcinogenicity

Hi Catherine, I'm sending you the final SAB report on BaP and I've extracted their bulleted recommendations below that may pertain to the section you worked on (see PDF pages 20-26). In some cases, these recommendations may be not worth the LOE. But then we will have to think about a polite way to say that. Or maybe there is an easier way to partially address their comments with some additional text.

As you probably know, BaP is on a very compressed schedule, so I would like to get a sense from you after you have skimmed over the comments about how long you think it would take to address these recommendations/comments.

-Kathleen
